Construction: Stainless Steel Lid,
Plated Tubular Steel Frame,
2-Blowers, Axial Vane 120V standard
or 220V optional
55 Gallon Steel Open Head Drum

Weight: 129 lbs

Height: 46"

Floor Space: 36" x 26"

Patent Pending

This innovative, easy to use incinerator is specifically designed for safe and efficient disposal of confiscated drugs. Drug Terminator is used by local law enforcement when other disposal options are limited.

Drug Terminator is wood or charcoal fired. Two high velocity electric blowers create a cyclone of intense heat eliminating illicit drugs quickly and completely. The volume of material is reduced to an average of 1 % ash. Non-combustible drug paraphernalia is sterilized by heat and can be disposed in municipal waste.

Drug Terminator has been developed from the Cyclonic Barrel Burner®, a highly successful and efficient incinerating device. Over two thousand Cyclonic Barrel Burners® are in use around the world.
